

EOS

A BUSINESS-ORIENTED PLATFORM FOR
DECENTRALIZED APPLICATIONS

Presented by

TOKENIKA

DISCLAIMER

- We are NOT in any way associated with block.one, the company developing EOS code. We are just part of the emerging EOS community.
- We have no interest in you buying EOS tokens, and this certainly should not be treated as financial advice.
- Our goal is to encourage you to take interest in the concept and possibly consider building businesses on top of EOS.

BLOCKCHAIN EVOLUTION

System for
simple payments
(Bitcoin)

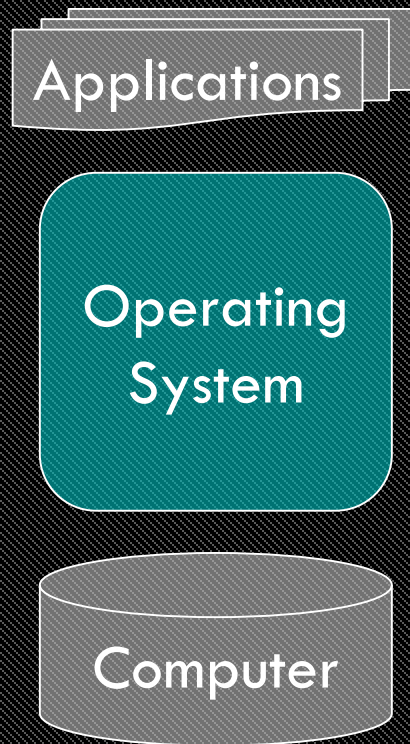

System for
smart-contracts
(Ethereum)

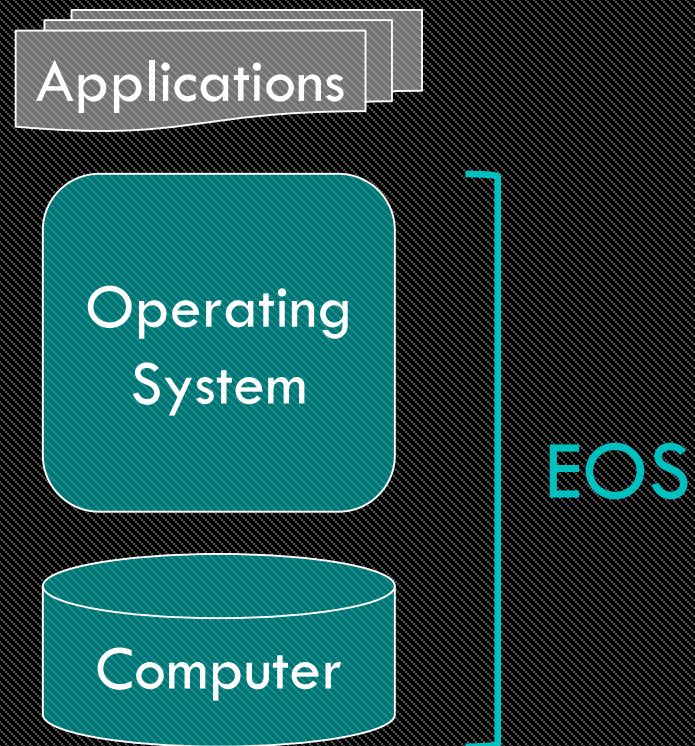

System for
decentralized
apps (EOS)

HOW DOES EOS WORK?

HOW DOES EOS WORK?

“ EOS is the blockchain for building commercial scale decentralized applications that are indistinguishable from centralized alternatives. ”

Daniel Larimer, CTO of block.one

WHAT DOES A DECENTRALIZED APP REQUIRE?

High
performance

Free for the
users

Easily
accessible

No fancy
cryptographic
stuff

Account
recovery

Privacy
protection

Access to
other
blockchains

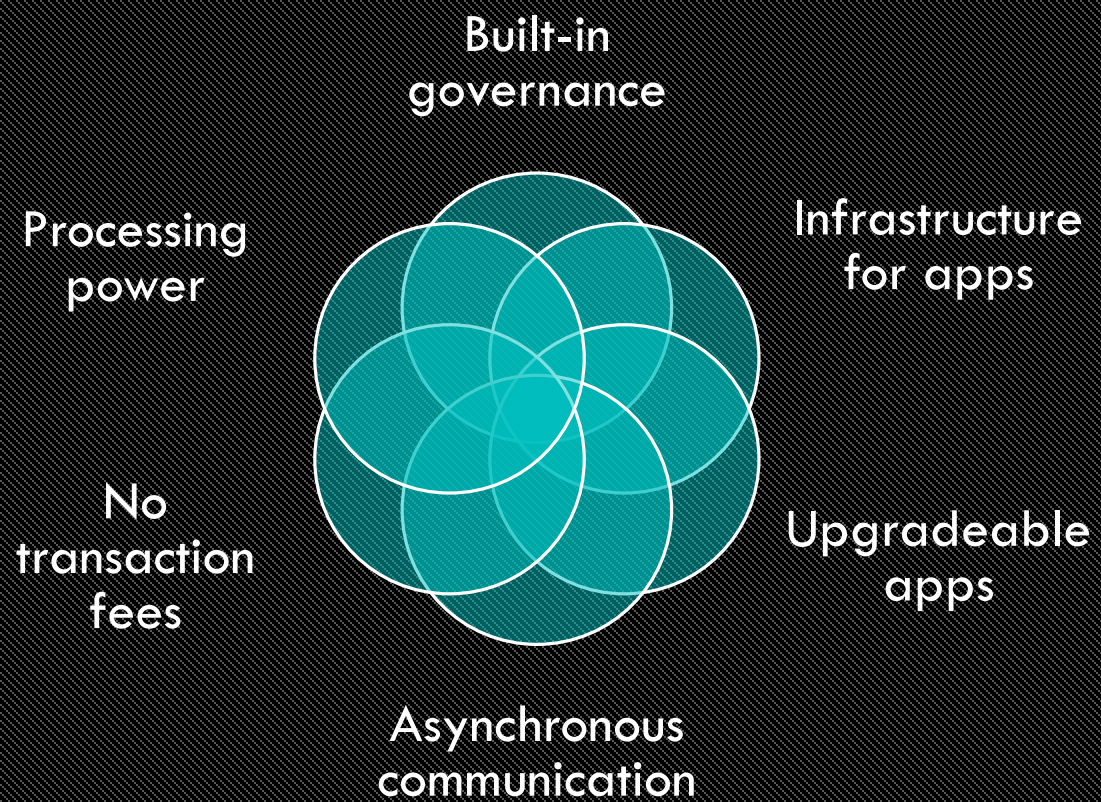

Upgradability

Bug recovery

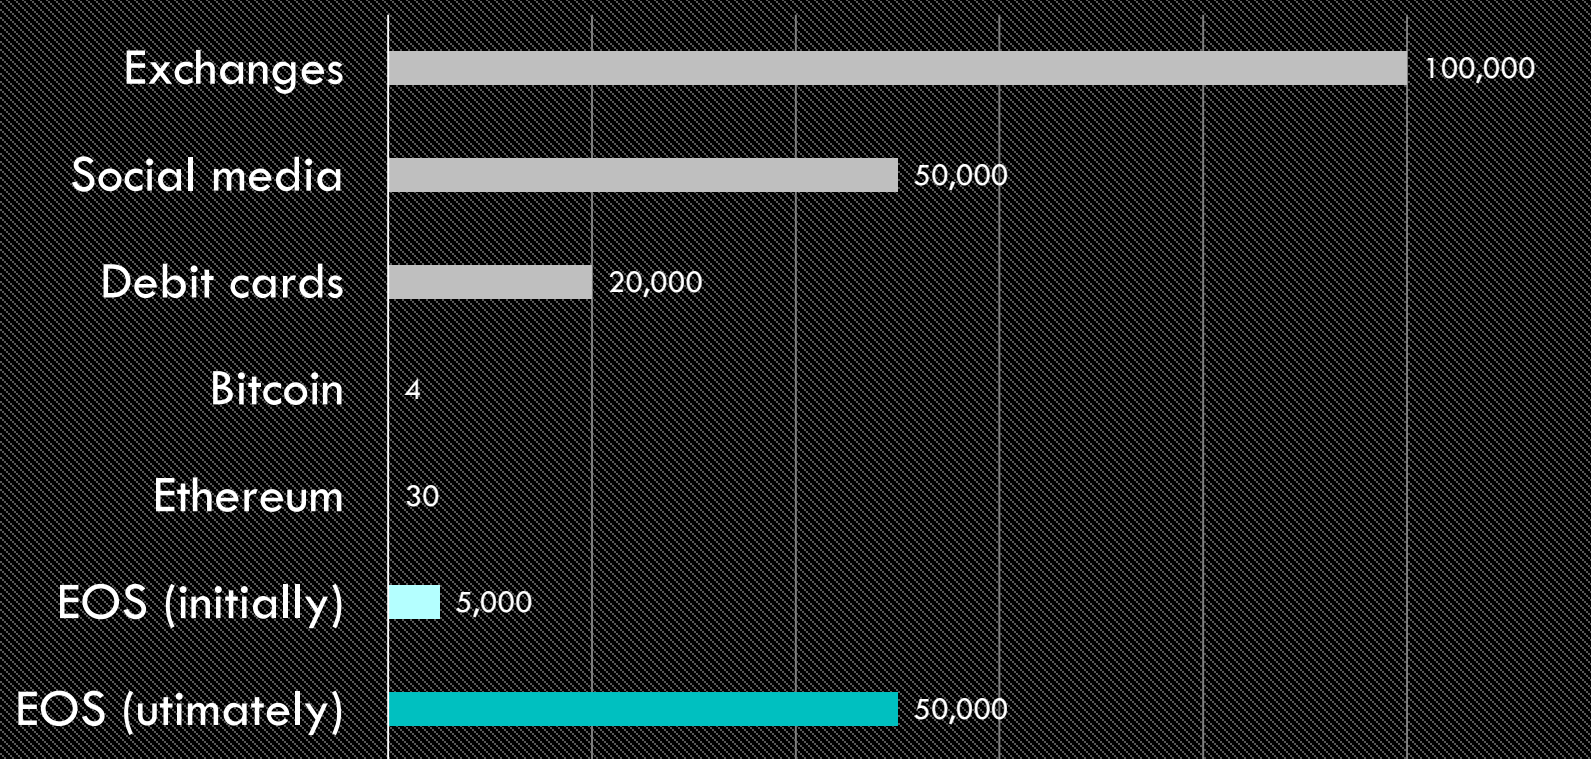

EOS VS. DECENTRALIZED APPS REQUIREMENTS

Ethereum		EOS
✗	High performace	✓
✗	Free for the users	✓
✓	Easily accessible	✓
?	No fancy cryptographic stuff	✓
✗	Account recovery	✓
✓	Privacy protection	?
?	Access to other blockchains	✓
?	Upgradability	✓
✗	Bug recovery	✓

WHAT ARE EOS MAIN FEATURES?

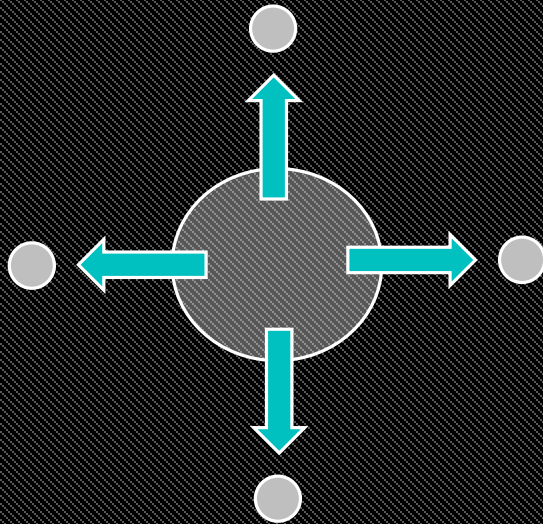

PROCESSING POWER

SUMMARY

- Revolution or evolution?
- Extremely business oriented
- Pragmatic approach: people are integral part of the process
